

SanificaAria 200

sanitization

UV OXY
TECHNOLOGY

LOCAL CONTROL

7000f³ per/hour

(3) SANITIZING SPEEDS

The **SanificaAria 200** provides complete room sanitization and is designed to operate in the presence of people. Using our patented **UvOxy®** technology, **SanificaAria** safely and effectively eliminates up to 99.99% of viruses, bacteria and spores without any filters, harmful UV-C exposure or Ozone generation.

SanificaAria draws air into a closed chamber via a variable speed axial fan. The air passes through the closed chamber that contains dual UV-C cartridges. The air is sanitized within the chamber and then expelled clean and disinfected. This nearly silent process can operate 24 hours a day. The UV-C cartridges have a service life of 8000 hours or nearly one year. A visual reminder on the front panel alerts when replacement cartridges are needed.

SanificaAria 200 is ideal for use in schools, hospitals, restaurants, hotels, retail stores, offices, co-working environments and service sector applications.

ORDERING INFORMATION

SA-200P	SanificaAria 200 portable, 75W, 120V, white cord & plug, floor stand
SA-200S	SanificaAria 200 surface, 75W, 120-277V, j-box mount

SPARE PARTS

SAC-200	SanificaAria 200 replacement cartridge lamp kit
----------------	---

TECHNICAL

Purification Rate: 7000 cubic ft / hour
Wavelength: 254nm
UV-C power: 2x24W
UV-C radiation power: 2x7.5W
Unit Consumption: 75W
Input voltage: 120V (portable)
 120-277V (surface)

INSTALLATION

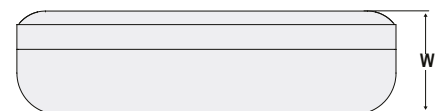

FLOOR

SURFACE

DIMENSIONS

Length	Height	Depth
17.9"	11.6"	4.9"
455mm	296mm	125mm
